

For ultimate adaptability, peak performance and intelligent solutions, our NEW iSITE Switch is a game changer.

Introducing SilverNet iSITE Switch - an industrial-grade 4G cellular router offering maximum flexibility, industrial toughness and a 30w PoE+ switch, which is useable for countless possible applications.

This cost-effective mobile router solution has embedded intelligent features designed to provide a smart, secure solution across a wide range of applications. **Where will you install iSITE Switch?**

Everything you need to know about the router that does almost everything...

iSITE Switch is not just your everyday industrial router. A hardened network switch that is easily deployable even on a global scale thanks to built in GPS tracker, it is highly adaptable and able to connect to 100's of different types of devices. iSITE Switch certainly isn't limited in its uses.

With the iSITE Switch you can add up to 2 SIMS, create VPN's, receive seamless uninterrupted wireless connectivity, and monitor and manage from anywhere with no need for a control room. The I/O contacts are ideal where cabinet security is required, allowing an alert to be sent via email or text.

Not enough? To fulfil market demand the iSITE Switch is built with a hardened enclosure, industrial components and a wide operation range for harsh environments. With comprehensive remote device management the iSITE Switch is extremely versatile in most IoT applications.

What makes iSITE Switch better than the rest?

- Hardened 4G Industrial dual sim wireless router
- Built in 4 port PoE+ 30w Switch
- 40° to +70° temperature range
- Built in GPS for location tracking
- Many interfaces including RS232/485 data comms

Dual SIMs for backup between multiple carrier networks

OpenVPN/IPsec/PPTP/L2TP/DMVPN/GRE

Supports Wi-Fi Client and AP Mode

High quality industrial components

Wide Operating Input Voltage

1 Digital Input and 1 Digital Output

& More...

A huge range of capabilities means an ever growing list of applications...

WIFI PTP then Uplink Over 4G | Remote

Working | Mobile Applications |

Waterboards for Remote Scada Data

Gathering | Monitoring of Remote Cameras

in 1 unit | Security & Rapid Deployment

Cameras | ANPR Systems | Data Backup for

Failover | EV Charging Point Data Gathering

| Remote Access Control | & More...

iSITE Switch is the ultimate industrial router solution you've been looking for. Intelligent, adaptable and tough, this game changing innovation is ready to order now.
