# High Performance

## Reliable Industrial & Commercial Network Switches

Our product range encompasses industrial-grade switches built to withstand harsh conditions, commercial switches for efficient business network management, and rack-mount switches for streamlined data centre and server room installations. These switches provide high-bandwidth connectivity, enhanced network security, and seamless integration, ensuring your critical infrastructure remains connected and operational at all times.

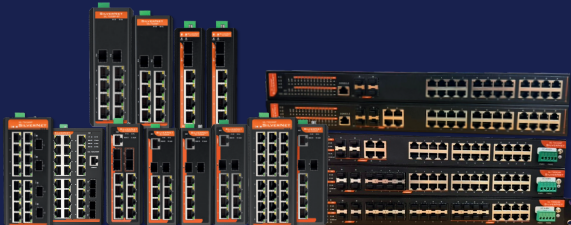

Our range of **Series 7 Industrial Network Switches** offers a diverse selection of versatile and powerful options, including managed and unmanaged switches, BT, 10G, and rack-mount switches. This extensive variety allows you to choose the ideal network switch that perfectly suits your specific needs.

**SilverNet Series 5 Commercial Switches** offer exceptional performance for expanding networks, ensuring stable and reliable Ethernet or Fibre transmission. With their high reliability and low power consumption, these switches are perfect for use with VoIP phones, IP cameras, wireless access points, and all SilverNet products.

## Powerful & Versatile Long Range Wireless Links

SilverNet specialises in robust, reliable wireless links, providing seamless connectivity solutions for a variety of applications. Our systems eliminate the need for costly and disruptive cabling, offering high-bandwidth, long-range connections for CCTV, data transfer, and network extension. Whether you need point-to-point/point-to-multipoint solutions our wireless technology delivers secure connectivity.

### PRO GENERATION 5 - 5 GHz Wireless Links

When speed, security, and reliability are non-negotiable standards, look no further. The PRO Range Generation5 is a class-leading outdoor wireless transmission platform built for professional and industrial-grade deployments. Compact and exceptionally rugged, Gen 5 features ultra-low latency (<5 ms), making it ideal for CCTV and VoIP. Utilising 4096-QAM modulation it boosts wireless capacity up to 2.5 Gbps. With a robust metal housing and 256-bit AES+ encryption, it provides a secure, future-proof backbone for smart cities, industrial estates, and emergency networks.

### STREAM - 60GHz Wireless Links

Compact yet packed with cutting-edge specifications, STREAM 60GHz Wireless Links offer unparalleled performance. STREAM is capable of establishing long-distance point-to-point (PtP) connections exceeding 2km, or connecting to up to 25 clients in a Multipoint configuration. Operating within the mmWave/60GHz band, STREAM is meticulously designed for CCTV, access control, or networks that require a reliable PtP or 60GHz point-to-multiple-point infrastructure.

# CHOOSE SILVERNET

## Incredible 99.999% Uptime

We use only the highest quality components, with the assurance of being manufactured right here in the UK, to ensure robust, reliable solutions with low cost of ownership.

## Powerful System Hardening and Security

Built to Secure-by-Design principles, our equipment meets NCSC CAF and ISO 27001 standards. Our hardware protects your networks through rigorous hardening and access restrictions.

## Uncomplicated Monitoring Software

Our easy to configure and use monitoring tool, SilverView, is a powerful network management software designed to streamline your network operations and provide you with valuable insights.

## Unbeatable Support & Training

We offer on-going support pre-and-post sales, easy to use installation guides and design tools, and various training courses to improve your knowledge of wireless with CCTV systems.

## Long Lasting Equipment – Guaranteed

Our equipment is designed to be rugged and reliable, indoors and outdoors. We believe in our products, and all equipment comes with a 2 year warranty, extendable up to 5 years.
